Hydretain Guarantee

Ecologel Solutions, LLC and your Hydretain distributor unconditionally guarantee your complete satisfaction with the performance of Hydretain or you will receive a full refund on your initial purchase of up to five gallons of Hydretain products.

All we ask is that you apply the Hydretain product properly according to the label instructions for your particular use and follow with the required amount of water necessary to move Hydretain to the appropriate soil level for maximum effectiveness (to the root zone for plants, grasses, shrubs and trees or at seed level for seed germination).

Please keep in mind that Hydretain's mode of action is to manage soil moisture by converting unavailable soil humidity into plant useable water droplets. Water thoroughly when re-watering Hydretain treated plants and extend the time between watering to reduce overall water usage.

If for any reason you are not completely satisfied with Hydretain's performance in reducing watering requirements and minimizing drought stress of ornamental plants, shrubs, trees and turf, simply complete the Guarantee Questionnaire and return it to your Hydretain Distributor for a full refund.

Sincerely,

A handwritten signature in black ink that reads "Richard K. Irwin".

Richard K. Irwin
